PERSONAL PROJECTS

Pivnica (04/2018 – Present)
- pivnica (brewery) application is a very simple web app created using AngularJS, Java 7, Spring, JPA, Hibernate, Maven. Application provides RESTful services. Frontend part is slightly touched with bootstrap.
- Planning to modify frontend part of application, provide log in mechanism for users and make shopping cart to buy a beer.

Utakmica (06/2018 – 07/2018)
- simple web app created using AngularJS, Java 7, Spring, JPA, Hibernate, Maven. Application provides RESTful services to create, update, delete/edit items. Frontend part is slightly touched with bootstrap.

milanbatalo (10/2018 – Present)
- Personal web site - portfolio

furniture-web-shop (10/2018 – Present)
- Web app created using AngularJS, Java 7, Spring, JPA, Hibernate, Maven. Application provides RESTful services to create, update, delete/edit and buy items. Search is optional. Using Postman, a web browser or any similar tool, you can also call each published service manually, providing the necessary JSON for each kind of request. Frontend part is slightly touched with bootstrap.
- Planning to modify frontend part of application, provide log in mechanism for users and make shopping cart.
